El Paso, Tex., Jan. 18 .- Albert Simmons, of Los Angeles, and Victor Hamilton, of Chicago, were murdered at Pedricini, Mexico, by Villa bandits, according to a despatch from Juarez. The men were mining prospectors.

The Carranza officials said that as far as they have been able to learn, the two Americans were killed without a chance to get out of the country and that the murders were committed simply because the men were Americans and subjects of the Wilson administration which is supporting the Carranza government.

Pedricini, the place where the Amer icans were killed, is sixty miles wes of Torreon.

The report of the killing of the two Americans came through the Carranza military officials at Juarez. They declared that Simmons and Hamilton had been killed by bandits under the leadership of the Arreta brothers.

Urge Joint Action to Stop Murders. Washington, Jan. 18 .- Establishment of a neutral zone in northern Mexico to be jointly policed by the forces o Mexico and the United States unles disorders are speedily controlled, is proposed in a resolution introduced by

Senator Gore, Democrat, of Oklahoma The resolution, which was referred to the foreign relations committee would authorize the president to enter into an agreement with General Carranza to use troops to restore order, and make life secure in that portion of Mexico adjacent to the United States. There was no discussion of the proposal.

Evidence obtained at El Paso by state department agents indicates that Carranza authorities at Chihuahua assured C. R. Watson, head of the party of American mining men, of whom sixteen were killed near Santa Ysabel that no escort was necessary.

In that opinion many of the Ameri gested to the authorities the advica of the front in Russia makes the eas bility of sending troops with the par | ern theatre of war the only one in

The advices further said the Carranza governor of Chihuahua gave Watson a personal passport, and that the Carranza immigration authorities in Juarez gave a general passport for the whole party. These development are taken to point to responsibility of the Carranza government for not adequately protecting the Americans.

State department officials indicated, however, that they did not consider the advices as being finally sufficient to determine the responsibility of the Carranza government, and further in Western Pennsylvania Sends Huge vestigation will be made.

THE KAISER SPEEDS TO RUSSIAN FRONT

German Offensive Expected When He Reaches War Zone.

Berlin, Jan. 18 .- Emperor William officially announced to be completely recovered and returning to the front, is reported at headquarters to be on his way to the eastern theatre of war

It is in the east that well-informed persons expect the next great battles to occur, and the arrival of the kalses there may be the signal for a renewa of the German offensive against the Russians, which was halted by the Serbian campaign.

Many Germans believe the war wi be won within Russia. The deadlock broken by the Teutons or the allie without enormous losses that would make victory in such operations an empty one, according to some German cans concurred, although they had sug experts. They point out the length military strategy.

The belief is growing in Berlin that there will be no campaign against Sa. lonika. By its victory in Serbia, Ger many accomplished its two-fold pur pose of making Bulgaria its ally an stopping the transportation of ammu nition to Russia from Salonika. Noth ing further would be gained by the capture of Salonika, the experts say

of Paper?

Mother sometimes is prone to think so, as she sees them rent in tatters.

She wonders if leather has gone out of use by shoemakers.

Of course, the shoe a healthy boy could not wear out is one . he couldn't wear.

But there are degrees in boy's shoes. Some are very much better than others.

Several brands have been built up by a maintained reputation for sterling qualities.

Mother should look into this shoe question carefully-and a good way to gather information is to read the advertising in a live newspaper like The Times.

THE LEADERS COTTON IS KING

The great thing in most January Sales is COTTON. The very much higher prices on Raw Cotton, with a still upward price tendency, brings into greater importance and prominence the advantages of our January Sale of cottons, and we can positively assure you that not in months to come will prices be as low as they are right now, and we confidently advise you to buy all the Cotton goods you require for some time to come. We stocked heavily months ago at old prices, foreseeing the advances that were bound to come.

The Unexpected in Table Damasks and Napkins all at Old Prices.

We are showing now a stock of good new style, clean made Muslin Underwear, at prices from 15 to 20 per cent, less than for similar goods if ordered now. It will pay to buy for a season's needs.

Should you desire to make up Underwear at home we can

furnish you the right materials at a siving, for the reason that we placed large orders months ago at July prices.

From orders placed at the time of the Mill clean up, we are now offering 150 Counterpanes of All Sizes, Crochet, Satin Finish, Marseilles &c., Square and Cut. Corners, at prices which positively better those we gave in early Fall. While this lot lasts, no advance.

We are glad to be able to say that we are in a position to furnish all widths of Sheeting and Pillow Muslins, all sizes of Sheets and Pillow Cases, either made up or by the yard at old prices. A number of grades in every width.

50 Pieces 32 in Renfrew Cinghams, New Plaids, Checks and Stripes, sun and tub proof at 12 1-2 cents. (price should be 15 cents.) 50 pieces Bates Seersucker Ginghams 12c. 60 Pcs. Assorted makes at 8 & 10 cts. A Gingham costs a little more than Calico but wears twice as long.

These wonderfully sturdy weaves for use for boys and girls of any age, as well for grown ups, are here in full assortments and at old prices, and in some instances at less than the makers advertised prices. Yard wide Percales at 9 & 12 1-2 cts.

Belgian and Irish Linen Weaves in which we over bought last Spring. A saving of a fourth over this year's prices.

A White year, or season is expected and the makers have outdone themselves in originating designs and weaves. Our orders are much in excess of any previous year for January, and as the scarcity has prevented us showing our completed purchase now, they are straggling in and even at that we are now showing more patterns and weaves than we have ever been able to show before.

Many of our November and December purchases for February and March deliveries are now in stock in advance of original desires. Styles are the very newest and values are exceptional. We are quite sure that at no time later will we be able to duplicate these prices.

A delayed Import has brought us 10 pieces of Damasks and 80 dozen Napkins to match, identically the old quality that we always sold at \$1.00, \$1.25 & \$150 per yard, in the best of patterns. This cannot happen again until flax raising and linen weaving gets back to normal.

A JOB THAT **FAILED**

By SARAH BAXTER

I'm a lady's maid.

When Mrs. Peabody went away for two weeks she said to me: "Mary, I bank, and I'm going to leave them! in your care. Keep them in the closet in the room where the telephone in places for rest and play. Few bankers strument is and sleep there. In case a burglar comes into the house you can call the police. But you needn't feat his breaking down the door of your room. Burglars never do that."

"Mrs. Peabody," I said, "you're very good to trust me with such valuable property. I'll have your jewels for you when you come back.'

"But remember, Mary," she said, " am trusting you only, not the other

after Mrs. Peabody left James, the but ler, came luto the room for something and saw me lock the door of the closet "What are you locking up so care fully?" he asked me.

"It's none of your business," says 1. "Yes, it is. Mr. Peabody put the house in my care while the family is away, and if there's valuables any where I'd ought to know it."

Fearing he'd talk about it before the other servants, I thought I'd best tel him that mistress' jewels were in the

Thursday before the family came home was my day out. I thought at first that I wouldn't go on account of the jewels, but they were locked in the closet and I would take the key with me. So I went. When I came back I went in at the servants' door and up to my room, where I took off my coat and hat and put on my black and white uniform. Then I went out into

There is a long mirror in the ball and usually when I passed it I gave a glance at myself in it. But this time was in a hurry, so I didn't.

But at the end of the hall, where there was no mirror, I saw myself coming toward myself. I stopped. wondering what was the matter, for the mirror hadn't been moved, and I couldn't understand seeing myseif Then the figure came toward me, and i saw that it was a real woman, and what broke me up was that she was not me. I caught at the banister to keep from falling; then I gasped:

Kansas City Banker Points Out Money Value of Good Roads. Kansas and Missouri are very active in building good highways-"rock roads," as they are called in that coun-

try, where limestone is the handlest material. One of the good roads boosters is W. S. Webb, a Kansas City banker, and he puts year round highways in terms of banking.

"We bankers will lend \$10 to \$25 an acre more on a farm situated on a rock haven't time to put my jewels in the road," he says. "Bankers in this neighborhood are keen judges of farm values. Most of them have farms as

re good farmers when it comes to making actual profits on crops, but their farming pays handsomely in health and in understanding of the problems confronting farmers, with whom we do much of our business.

"The first thing the banker does when you approach him for a loan on farm property is to determine the selling value of the farm. He will lend you half the selling value, and he arrives at the selling value by ascertaining three things:

"First.-The soil, its character, condition and producing capacity, for fertile farm in good tilth will grow erops, no matter where located or what the nature of its improvements.

"Second.-Its location, which means convenience to markets, schools, stores and other factors that increase value. Here is where the kind of road running past the farm plays a big part. "Third.-Buildings and improvements.

"These are all estimated in actual money. The money estimates are added. The total represents the selling value of the farm, and the banker will lend half of that.

"Suppose the land is set down as worth \$40 an acre. If it is located on a rock road over which the owner car haul crops any month in the year the banker will add \$10 an acre for that item. Probably the buildings will not come to more than \$10 an acre, so th hard road is worth as much as the buildings in actual money. The total selling value of that farm is \$60 an acre, and the banker will lend \$30. On land worth \$100 an acre a hard road adds \$25."-Country Gentleman.

\$250,000.000 FOR HIGHWAYS.

This Huge Sum Was Spent In 1914 For Roads In United States.

Very nearly a quarter of a billion dollars were spent in highway construction and maintenance in the United States during the year 1914, as shown by statistics issued by the office of public roads and rural engineering. One-fifth of the work was done under the state aid system, the various state highway departments paying \$24,220. 000 and the counties and townships "No; you're not. I'm Mary Murphy. \$25,220,000. State aid laws are in effect in forty-four states. New Jersey having instituted the system in 1801 and Tennessee and Georgia being among the last to adopt it.

Thirteen states spent \$25,605,000 and maintenance of state roads solely at their own expense, making a total of almost \$50,000,000 paid directly out of state funds. One-third as much (\$12,500,000) was spent for repairs and maintenance as was spent for new construction (\$35,500,000). This shows the enormous loss resulting from the building of types of roads whose surfaces are not durable under present traffic conditions. Six eastern states paid two-thirds as much out of the state treasury for maintenance as for new construction.

A python generally lives in a hole in the ground or a hollow in a tree, but if it can find an old ruin in the jungle -and there are many old rains in India-it likes to take up its sleeping quarters there, because even in the heaviest rains the water runs off the ruins quickly, whereas a hole in the ground is likely to be flooded. The python needs to est only once a week, and to get that mea! it lies that along

When the natives see the long trail that the python's body makes near the bank and find a heap of ruins near by they make a hole in the ruined wal just exactly big enough for the python to get through. Then they tie a pig to a stake near the hole on one side of the wall, and on the other side of the wall opposite the hole they tie another pig to a stake. They also tie a wire to the leg or the tail of the near side pig, and as evening draws on they twist it from a distance, and the pig squeals. As the python comes home

So the python comes along merrily and seizes its supper at a single bite. Down goes the pig into the big snake's throat, sucked in slowly by sheer muscular action. In about half an hour the pig has passed completely down th long neck, and in another balt hour it is down a couple of yards far-

known as the "Old Capitol building" has a memorable history. It was erected in 1800 and was originally designed as a tavern or boarding house. On account of poor management the tavern was closed after a few years. During the war of 1812 the British captured Washington and burned several of the public buildings, including the apitol. The government then purchased this tayern building for the use of congress, and here both houses met for several years. Within its walls two presidents were inaugurated, and in it John C. DELEGATES HAVE GOOD CHANCES'

Republicans May Get Gandidato From Floor of Convention.

HAS HAPPENED IN THE PAST

By ARTHUR W. DUNN.

Washington: Feb. 18. [Special. There may be a number of presidential ossibilities in the Republican national onvention. Garfield was a delegate when he was nominated. Bryan was a delegate when nominated. Roosevelt was a delegate when nominated for vice president. Oh, there are chances for men who are delegates

In the Republican convention it is quite possible that we shall see among Massachusetts, Governor Willis, Senator Harding and Myron T. Herrick of Ohio: Jim Mann of Illinois, Governor Hadley of Missouri, Senator Borah . f Idaho and perhaps others who might be selected for the candidate.

Mann Not Hysterical.

"I do not flink I am hysterical, said Minority Leader Mann, speaking on one of the defense measures; "I! have found that my main trouble in life has been in being too cold blood-

There are a lot of people who will subscribe to that statement. Jim Mann is rarely excited, but as he grows older he becomes more mellow. The milk of human kindness affects him occasionally, and he seems less of a machine than in past years.

Cost of His Salt. A Hoosier, who has moved to south ern California, writes to friends North, complaining of the "skinning of the natives' and tourists." "I always had believed," he wrote, "that the Pacific ocean was salty, yet we pay ten cents a pound for the same salt out here that we used to buy for three cents a heard of any 'native' salt being discovered in White river, Fall creek, Pogues and Pleasant runs."

Had Made a Good Start.

ORGANIZATION FOR FARM-

There is now a movement une der way in the far west for a & great national organization of farmers. No one will be eligible & for membership except those & r who depend upon farming for a r livelihood. The object of the ore ganization will be to secure fair * laws for farmers, laws that really are what they are represente ed to be, and to have repealed * farmers quiet, such as the dewhich has proved to be a disappointment to those it was expecte cd to benefit most, Hustling . western farmers have this movement well under way, operating & in a quiet manner.-New York &

MAKING FARMING PAY.

There Are Four Factors Which Must Be Taken Into Consideration. Prepared by Minnesota experiment sta-

A farm management demonstration in southwestern Minnesota showed that the average labor income of sixty-three farms taken in order was \$423. This means that the farmer had \$423 left for his own work above all business expenses and 5 per cent interest on an average investment of \$24,500. In addition to the foregoing, the farmer had his house rent and such products as the farm furnished toward the family living. The results given coincide with extensive investigations in several states, which have shown that one should endeavor to exceed the average of one's locality in as many of the folowing ways as possible if a profitable arm business is desired: First, size of ousiness; second, crop yields per acre; third, live stock receipts per \$1 of feed; ourth, amount of work accomplished

In this locality the average farm had 192 acres of crops. The yields per acre of the leading crops were: Corn, thirtynine bushels; wheat, eleven bushels; oats, thirty-five bushels. The average receipts for \$1 spent for feed were \$1.16, and the average amount of work done per man was the raising of 100 acres of crops and the care of a corresponding amount of live stock. The foregoing averages should not be taken as applying to any locality except the one included in this demonstration.

There were five farmers who fell beow the average in each of the four factors. Not one of the five made as much as a \$500 labor income. Of eighteen farmers who exceeded the above average in but one of the four factors only one made a \$500 labor inome. Again, eleven farmers exceeded the average in three of the four James Noel, clerk ten who made more than a \$500 labor ucome. Just five farmers exceeded the average of their neighbors in all factors, and every one made more than \$500 labor income

This demonstration shows that under he conditions prevalent in southwestrn Minnesota in the year 1914 a farmer who can do a little better than the verage of his neighbors in at least three of the above four factors is alnost certain to make more than 5 per ent interest on the investment and a labor income of over \$500.

Harrow Attachment For Plows. Harrowing sufficiently close behind ie plow when the work is rushing and hands are scarce is a problem, says the Farming Business. Here is shown a harrow attachment for walking plows and one that requires little

great deal of work at a time when the work is most needed. It can be drawn by one team or by the addition of a single extra horse. It will save the use of a man and team or, at least, half a team, according to its inventor.

Fighting Apple Scab.

The fungus which causes this disuse lives over winter in the infected ireas of dead and decaying apple leaves. In the spring it produces tiny spores. These spores may be carried by wind or by birds to the young and tender foliage, where they germinate readily and produce infections which endanger both fruit and leaves.

The first step in the control of apple cab is to destroy the sources of infec ion. The methods by which this may not be cultivated the dead leaves should be raked and burned at some time during the late fall or early pring plowing is recommended, as i

lisense is to protect the foliage by the Baume at the rate of one and a half first application should be given when the blossom buds are beginning to seprate in the cluster and show a pink The second should be applied ist after the petals fall and a third en days or two weeks later.

Where rainfall is plentiful a fourth spraying may prove beneficial .- M. A. Willis, Idaho Station.

The Armenian Stronghold is Captured After Five Days of Fiercest Fight-

Petrograd, Feb. 18.-Erzerum, the great Armenian fortress where the main Turkish Caucasus army has been besieged, has fallen into the hands of the Russians.

The official Messenger estimates the Turkish garrison captured as 100,000 1000 guns were the victor's booty It is said there were 467 guns The Turkish forces which escaped was not mentioned in the letter.

capture are fleeing westward. There are no advices concerning the German Field Marshals von der Goltz and you Sanders, who had been previously reported as directing the de fence of Erzerum.

It is said that the Russians had to overcome the greatest of difficulties in getting their heavy guns into position for the final assault.

Tiffis reports state that the battle of Erzerum was the flercest that has ever been fought about a fortress in modern warfare. The Turks fought desperately, but one by one the mighty forts were taken by the Russians, who charged with the bayonet through breaches made by their artillery. Turkish gun crews were bayonetted as they were still working their weap ons, many refusing to surrender.
